Supporting Evidence - F-01

Annotated demonstration screenshot

The screenshot below captures a browser-based job-monitor mock-up using fictional records. It is not a SAP system screenshot or evidence from a client engagement.

How this supports the sample finding

1. Cancelled job: Z_DEMO_INTERFACE illustrates a job that needs log review.
2. Runtime exceptions: Z_DEMO_HOUSEKEEP and Z_DEMO_ARCHIVE exceed the sample 30-minute threshold.
3. Context: System, client, review period and threshold are shown to make the observation traceable.

For actual engagements, use authorised screenshots, redact confidential details and map each image to its finding and review period.
